DETAILED ACTION

Allowable Subject Matter

1. Claims 1-23 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: claims 1 and 13 recite, inter alia, "a conductive connecting structure positioned on one side of the recession, the connecting portion for electrically contacting the first and second portion electrically connected structure having a first contact pad to the first portion ; and a probe card positioned above the tray, the probe card having at least two probes for electrically contacting the second contact pad and the second portion respectively." In addition, the above conductive and the contact pad are located in a different sides and can be checked continuously, therefore, they can prevent commonly problems, such as, cannot do an electrical test for such LCOS display panel therefore, it helps to avoid LCOS display panel having defects that are generated prior to the package process is often discovered after the package process, which increases the cost of the package process and reduces the quality of the package process.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations. Although Jiles et al. (U.S. 6,664,864) disclose a Cavity design printed circuit board for a temperature compensated crystal oscillator and a temperature compensated crystal oscillator employing the same and Mathew et al. (U.S. 6,498,636) disclose a Apparatus and

method for substantially stress-free electrical connection to a liquid crystal display, they do not disclose the above-mentioned limitations.

Conclusion

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
